RAYMOND
A live town in a rich agricultural and stock-raising district. A good place to make your home.

Volume 32

FRIDAY, AUGUST 31, 1934

Number 21

Conference August 21st, 22nd, 23rd.

In the Stake Priesthood Meeting on Sunday last, Pres. H. S. Allen announced the Quarterly Conference dates as August 21-22-23, evening meetings for the general assembly, and special Convention Meetings for Relief Society workers. Meetings will commence at 8 p.m. according to present plans.

Members of the M. I. A. boards as additions were: Young Women's Misses Velma Meldrum and Dorothy Nurse, and Mesdames Angelina Witbeck Phoebe Dahl and Rachael Kirkham. E. W. Bascom and Louis Brandley were made members of the Young Men's Stake Board.

Pres. O. H. Snow spoke and mentioned the laxity of the Priesthood quorums, especially the Elders, in living up to the promises they make when ordained, as to Tithing, the Word of Wisdom, keeping the Sabbath Day Holy, and other covenants they take upon themselves. The Priesthood carried with it sacred privileges and great responsibilities, and it was the duty of every man who held it, to magnify this honor, by obeying authority and living so that the power of the Priesthood might remain with him.

The day was very sultry, and some of the auxiliaries not holding their regular meeting cut down the attendance at the session.

NEW WAREHOUSE AT ELLISON ELEVATOR

Work is progressing nicely on the new Office and Flour Warehouse, being built at the Ellison Elevator Co.'s elevator here. The building and foundation are all in, and the floor is being laid, and Thursday morning bricklaying started on the walls of the building, and in a week or ten days it will be completed and ready for occupancy.

The old power house of the Raymond Electric Co. is being torn down to provide brick for the new structure, and the new warehouse will be 32x10 ft., one story and will make the layout at the local agency much more compact than has been the case, as having to cross the track every time a sack of flour or feed was wanted has been a joke, especially when a string of cars has been parked on the siding.

Jas. Nielson, Superintendent of Elevators for the Ellison Co. and James Patterson, carpenter for the Company, are here in charge of the work, and a number of local men are employed on the structure.

While construction is going on Mac's office has been moved back about 100 feet from its old location and business is being carried on as usual.

CROP CONDITION

Harvesting is on, and before man days will be going full speed. Nearly all of the winter wheat has been cut, and some threshed and marketed. We examined some winter wheat in the Ellison Elevator Thursday which had just been unloaded, it graded No. 1 hard, and netted the grower 67 1/2 c. per bushel.

Combines are starting, but this work is not general yet. Binders will be in fifty per cent of the fields by Wednesday next. What promised a 35 bushel average has been cut to about 20 or 25 by the prolonged dry spell. If prices remain steady however, farmers will get a pretty good return at that.

Mr. and Mrs. G. H. Snow left on Wednesday for their holiday going from here to Waterton Park for a few days. Miss Edith Woolley is in charge of the office while the Secretary is away.

Sam Dyson's class of Deacons of the Raymond Second Ward were taken to Waterton Park last Saturday in Miss Albert's truck for a week's outing, and will return Sunday. Karl Alfred is Quorum President and Billy Nalder is Secretary. The boys are having a wonderful time according to reports.

R. V. Gibbons, prominent business man of Lethbridge, and known to many Raymond people is dead as the result of an automobile accident near Macleod last Saturday. He died in the Macleod Hospital Wednesday evening. He had been in the real estate and insurance business for years.

L. MacPhee was struck by a passing car Wednesday night on his way home from Lethbridge, and his car had to be taken back to the city for repairs. Mr. Peterson, who was driving with a light misjudged the distance and hit Mac's car just behind the bumper tearing off the left front wheel. The Peterson car was also damaged on the front. Neither of the drivers were injured.

Municipal Council Meeting Held

The Municipal Councilmen met in their regular session Tuesday afternoon, putting the meeting a week so that the Secretary could leave on his holidays and not interfere with the plans of the Municipality for the Town.

It was decided to close the Bait Mixing Station down now, and unless absolutely necessary to not put any more bait this season. The run has been heavy and good results have been obtained, and the Council felt that the bait was being well in hand.

The question of purchasing an elevated grade for the Municipality, which has been discussed at some length, was talked over again, and it was left with Councilmen Brandley and Ongilt to make a final decision on the matter.

The monthly bills were passed and ordered paid.

Womens Institute Fair August 15th.

The Warner Constituency Flower Show and Fair will be held in the High School building, Raymond, on Wednesday, August 15th, and the public is especially invited to attend the Fair, especially in the afternoon when it will be open to visitors.

There are six organizations in the Constituency and the collection is expected to be large, and competitions keen in all classes. Remember the date of the Fair.

The Conference meetings of the Constituency will be held in connection with the Fair, and the Provincial President, Mrs. Ferguson, and District Director Mrs. Thompson are expected to be present at the Conference, over which Mrs. A. W. Kirkham who is Constituency Conventor will preside.

Wheat prices were higher again this week and local elevators were paying 67 1/2 c. per bushel for wheat in wagon load lots.

When you buy from the merchants who use these columns you are helping those who help us, so that we may help you. The thing goes in a circle.

Magistrate J. W. Low of Cardston and Constable Ellis, R.C.M.P., of Magrath, were in Raymond Tuesday on official business.

One month of the school holidays are over, and it will be winter for the kids as soon as they have to troop back to the school house.

Construction is under way now for a new home for Clifford Gough on the lot just south of the old Arthur Dahl home. Excavating was finished the last part of the week and the cement work is now in progress.

Mr. and Mrs. J. C. Cahoon, and Mr. Saunders, all of Cardston, were Raymond visitors on Sunday with Mr. and Mrs. Lovell and family. Their little granddaughter Geraldine, went home with them for a few days.

Wildie Bros. April lambs in the Geo. Atwood sheep herd on Kings Lake were weighed last week, and weighed from 77 to 106 pounds. George says they will average about 100 pounds throughout. Pretty good lambs don't you think?

The heat record for 1934 was reached over the week-end when temperatures from 95 to 100 degrees were reported in Southern Alberta. Monday evening and night and Tuesday found the air considerably cooler.

John N. Powell, 21, of Frank Ata, died Sunday as the result of a broken neck when he dove into two feet of water and hit his head on a sand bar. His companions pulled him out and summoned a doctor, but he was dead when the medical man arrived.

Marie Dressler, Canadian born actress who rose to fame in the Talkies, passed away Saturday after a prolonged illness in Santa Barbara, California. Her whole life had been spent on the stage some of her pictures being silent ones, before the advent of the Talkie.

The strike on the Pacific coast is ended with a decision of the Longshoremen to submit their case to arbitration and to busy as a peacemaker encourage the meantime return to work. They took up their tasks again on Tuesday.

Mr. and Mrs. Paul Redd returned from Edmonton last week where Paul has been busy for the past three weeks making departmental examination papers.

"Little Man What Now" at the Capitol next week-end with Margara Sullivan, is a picture you will not want to miss. See it by all means.

Forest Fires Cause Heavy Property Loss

News Notes

T. L. Halpin, now of Rockford, formerly Manager of the Canadian Bank of Commerce here was a visitor in town Monday and Tuesday of this week.

Friday, Saturday and Sunday were very warm days, and the chief occupation was to find a cool place where one could relax and breathe easy.

Mr. and Mrs. Ernest Nilsson and family spent last week at Waterton Park on a brief holiday, before the start of harvest.

J. W. McDerby, the Typewriter man was a Raymond visitor on Wednesday checking over the wants of typewriter owners.

When you buy from the merchants who use these columns you are helping those who help us, so that we may help you. The thing goes in a circle.

Magistrate J. W. Low of Cardston and Constable Ellis, R.C.M.P., of Magrath, were in Raymond Tuesday on official business.

One month of the school holidays are over, and it will be winter for the kids as soon as they have to troop back to the school house.

Construction is under way now for a new home for Clifford Gough on the lot just south of the old Arthur Dahl home. Excavating was finished the last part of the week and the cement work is now in progress.

Mr. and Mrs. J. C. Cahoon, and Mr. Saunders, all of Cardston, were Raymond visitors on Sunday with Mr. and Mrs. Lovell and family. Their little granddaughter Geraldine, went home with them for a few days.

Wildie Bros. April lambs in the Geo. Atwood sheep herd on Kings Lake were weighed last week, and weighed from 77 to 106 pounds. George says they will average about 100 pounds throughout. Pretty good lambs don't you think?

The heat record for 1934 was reached over the week-end when temperatures from 95 to 100 degrees were reported in Southern Alberta. Monday evening and night and Tuesday found the air considerably cooler.

John N. Powell, 21, of Frank Ata, died Sunday as the result of a broken neck when he dove into two feet of water and hit his head on a sand bar. His companions pulled him out and summoned a doctor, but he was dead when the medical man arrived.

Marie Dressler, Canadian born actress who rose to fame in the Talkies, passed away Saturday after a prolonged illness in Santa Barbara, California. Her whole life had been spent on the stage some of her pictures being silent ones, before the advent of the Talkie.

The strike on the Pacific coast is ended with a decision of the Longshoremen to submit their case to arbitration and to busy as a peacemaker encourage the meantime return to work. They took up their tasks again on Tuesday.

Mr. and Mrs. Paul Redd returned from Edmonton last week where Paul has been busy for the past three weeks making departmental examination papers.

Forest fires along the Pacific Coast slopes, both east and west of the main chain of mountains are taking a very heavy toll of timber, pasture, and grain according to paper reports during the week.

In the Crow's Nest Pass two fires were raging, and burning to a meeting point, and only due to a fortunate change of wind about 10 p.m. Monday evening was the town of Frank saved, after the fire had burned within a mile of it, and most of the residents had packed up ready to leave at a moment's notice. The fire doubled back on itself, and the town was safe for the time at least. The remains of the mine workings at Lille, four miles north of Blairmore were threatened, and were right in the path of the flames. Every available man was called out to fight the flames, but apparently were fighting a losing battle.

Over in British Columbia and south into Washington and Idaho fires were getting beyond control, and had burned several saw mills, pastures, and wheat fields to say nothing of the millions of dollars lost through destruction of timber stands. And even farther down the coast in southern Oregon and California forest fires were raging wildly and clearing up millions of feet of timber, sweeping pastures, grain fields, and a number of farm homes were also in danger. To date no loss of life has been reported.

News Notes

Mr. and Mrs. R. W. Tollestrup returned home Wednesday from their holiday trip.

Winston Shaw is helping in the Mercantile Hardware Dept. while his father is on his holidays.

Pat O'Brien in "Hollywood Speaks" at the Capitol Saturday is real entertainment and you may win the beautiful set of silverware.

Mr. and Mrs. A. L. Yates and two children, of Salt Lake City, have been visiting for the week in Raymond with the A. W. Kirkham family. Mrs. Yates is a sister of Mrs. A. W. Kirkham.

Lethbridge is preparing for a Kiwanis Convention the first of next week, and a great many delegates are expected to attend from the Kiwanis district for which this Convention is being held.

The Kirkham and Yates families held a dinner party in Henderson Park Friday afternoon, and spent the week end at Waterton Park, prior to the departure of the Yates family for their home in Utah.

Word has been received of the birth of a baby girl to Mr. and Mrs. Clusie Nilsson, who are now living in Ogden, Utah. This is the first girl in the family, and the announcement is therefore news.

With the continued dry spell the gardens are badly in need of water, and Constable Hawk is busy as a peacemaker encouraging people to take their turns and not try and swipe to many turns of water from their neighbors.

"Little Man What Now" at the Capitol next week-end with Margara Sullivan, is a picture you will not want to miss. See it by all means.

President Hindenburg Loses Last Battle

President Paul Von Hindenburg, Iron Man and Chief of Staff of the German forces during the World War, and who earned the love and confidence of his countrymen so that he has been known as Father of His Country, since, is dead at the age of 86 years.

He had been President since 1925, and was considered the balance wheel of the nation, especially since the rise of Adolf Hitler to nation-wide notoriety. Within seven hours after his death power of President and Chancellor was vested in Hitler, pending an election on August 19th.

Conservative minded people are wondering just what effect the President's death will have on the unrest of the country, and other supposedly reliable sources state that Hitler is trying his best to have made dictatorial supreme of the nation to further increase his power. Time will answer all these questions.

LOU'S CORNER

MORE ABOUT TIRES TODAY

Because present day automobiles can jump from a standing start to 30 or more miles an hour in a few seconds and because with four wheel brakes of today a car travelling at 50 miles per hour can be brought to a dead stop in about 3 seconds, we find that a good deal of the tread is scuffed off.

Maybe it would help if our Road Maintenance Committee realized that the rate of tread wear on tires is 50 times as fast on the worst type of roads as compared to the best type.

Few people know definitely whether or not their front wheels are in true alignment. Wheels that do not track or run parallel with each other scrape off the tread rubber. A tire only 1/2 inch out of line will be dragged sideways 87 feet in every mile. This aligning job may be had without cost at King Motors.

WEEKLY LETTER POULTRY MITE CONTROL

This is the time of the year when mites may be a source of considerable trouble to poultry and if their ravages are not checked they cause heavy losses. The poultryman at this Station stresses the need for continued vigilance during the summer season. The mites do not live on the birds during the day but will be found in the dark cracks and crevices of the drop boards, roosts and nests, from where they attack their unsuspecting hosts during the night.

The method of control used and recommended at this Station is to thoroughly clean the house and scum all possible hiding places with a mixture of low grade coal oil and a standard disinfectant.

If mites are present in any number this procedure should be followed every ten days until control is obtained. At this Station the mites have been so completely controlled by this method that last summer it was necessary to spray only once, and this summer mites have not yet appeared although a careful examination is made at least once a week. No mites have ever been found in the house in which the young stock is kept on this freedom from mites is maintained by thoroughly cleaning and disinfecting the houses each spring and by raising the young stock separate from the mature.

BEES

Honey is being extracted at the Station apiary. The Head Beekeeper, H. T. Luther, has the following suggestions to make to the amateur beekeeper regarding August operations: "It is well to start by about August 10th to reduce superfluous room by removing all well-capped honey and so dispense with any unnecessary supers.

The bees should have sufficient room to take care of any reasonable flow of honey during August, but should not have unnecessary space that has to be kept warm. It is assumed that all colonies strong laying queen, i.e., that the necessary re-queening has already been done. It is also well to look to the prevention of the brood chamber by seeing that straight good combs are supplied and that no frames are left that have candied honey in the corners, or contain any old dried pollen."

IS A CLEAN CAMPAIGN POSSIBLE

Next year Canada will have a Dominion election and Alberta will also have a Provincial election. Even now the long headed gentlemen who expect to get in to the fray are busy amassing data, statistics, facts, and otherwise, to load the cannon of the campaign and lead the people to the Promised (?) Land.

Would a clean, fair and honorable campaign be possible? It seems that at election time we forget the soundness of "Honest Abe's" statement when he said, "You can fool all the people some of the time, and some of the people all the time, but you can't fool all the people all the time." Our political speakers mount the platform with the idea that the people are going to believe all they hear, that they do not remember back at all, and that they have no reasoning powers of their own. In other words they think they can fool all the people all the time.

People are accused of not being interested in political questions when they decline to go out to meetings, and hear the continual mud-slinging and haranguing of one party about the other, and for the past 25 years of which we can remember pretty well, every election campaign has been the same story. Always tearing down the honest efforts of the opposition, never crediting them with any real interest in the people's welfare, and holding themselves up as the saviors of the people, and making promises that they, themselves know are absolutely impossible of fulfillment. Is it any wonder that people tire of hearing this kind of stuff every time a political campaign rolls round?

We do not expect one party to spend all its time extolling the virtues of the opposition, but it seems only fair that credit be given where credit is due. If the party in power has made mistakes, well and good, point them out. If a legacy handed down from their predecessors has merely multiplied in its evils during the interim then take the blame for starting the sore which has turned out to be a boil where it belongs. A little praise where it is really

due will make many more real friends than continual criticism and fault-finding and praising oneself.

Many think the party system has had its day, and that we should get a government representative of the best interests of the people, and all support it. We are not saying anything in this respect, but surely it is time that our campaigns were carried on in a respectable and pleasant manner as benefits civil folk.

CANADIAN STUDENTS AT B. Y. U.

Two Canadian students are attending the Alpine session of Brigham Young University's summer school high on the eastern slope of Mount Timpanogos. Five Canadians attended the first term of the summer school, which ended July 20.

John W. Payne, teacher in the public school, is studying sociology. His family lives in Prov., eighteen miles from the Alpine campus, and he commutes every day. Reed Hacking, formerly of Magrath but lately a California resident, is also attending the summer term.

Golden Woolf, former high school principal at Magrath, Norma Smith, grade teacher of Cardston, and Howard Forsyth of Cardston were students at the first term of the summer school. Norma Smith and Mr. Woolf have returned to Canada.

Twenty-four Canadians attended the Latter Day Saint institution during the past year, attesting to its increasing popularity among Canadian students. For the first time in the history of the school, a Canadian club was organized with Stewart Grow of Cardston, president, Alice Rivie of Magrath, vice-president, and Howard Forsyth, Cardston, sec. The club was active during the year, and its basketball team won second place in a tie-off series against a strong California Arizona club team in the annual geographic club competition.

In the June graduation exercises five Canadians received degrees. They are Retta Coombs, Spencer and Katherine Grow, of Cardston, Golden Woolf of Magrath, and David Allard of Raymond. Several Canadian students expect to be graduated in 1935.

LAUGHING GAS

A lady motorist was driving along a country road when she saw a couple of repair men climbing telephone poles. "Fools!" she exclaimed. "They must think I never drove a car before."

Here and There

The Open Dominion championship match in the Dominion Marksmen Revolver competition was won recently by the Canadian Pacific Railway Ontario police team with a score of 1435 points out of a possible 1500. R. C. M. P., civic and provincial police also competed.

Plans for the musical festival of Western Canada during the coming year with a tentative discussion of policies for the next two seasons, were featured at a meeting of delegates of Western Competition Festivals recently at the Palliser Hotel, Calgary.

John Jacob Astor and his bride have decided to extend their honeymoon tour to the Canadian Rockies and British Columbia. "We intend to stop over at Lake Louise," said the young millionaire, "and then move on to Vancouver, taking in the sights on the way."

Captain R. G. Latta, skipper of the liner Empress of Britain and commodore of the Canadian Pacific fleet, retired from active duty recently. He was succeeded on the bridge of the Britain by Captain R. N. Stuart, V.C., D.S.O., U.S.N.C., R.D., R.N.R. Captain Stuart was promoted to the post of commodore of the Canadian Pacific fleet.

Indicating the trend towards greater production and recovery of business, a substantial increase in the second quarter of 1934 as compared with the corresponding period of 1933 is shown in the recently published production figures of Consolidated Mining and Smelting, one of world's greatest mining companies.

Driving a highly decorated locomotive into the Canadian Pacific Railway depot at the end of the Calgary-Edmonton run recently, A. N. Hobkirk, veteran engineer, completed 43 years of continuous service with the railway, most of it at the throttle of an engine. "I have always liked my work and I hate to quit," said Mr. Hobkirk.

Founded June 13, 1874, by George and Mathew Beatty and with agencies, warehouses, offices or depots across Canada, New Zealand, the United Kingdom and fifty other countries, the national and world-wide exporting house of Beatty Bros. manufacturers of washing machines and farm implements, celebrated its Diamond Jubilee at Fergus, Ont., last month.

John F. Sweeting, industrial commissioner of the Canadian Pacific Railway, states in an official publication of the railway that there is a decidedly firm tone of confidence in the West and increased activity in many industries, with the tourist business promising to be better at all resorts this year.

An increase of \$77,900 lbs. in the Nova Scotia lobster catch during the month of May was instrumental in raising the landed value \$333,468 over the same month in 1933, according to an announcement by the Department of Fisheries on June 25th.

The Broadway Store had a clothes cupboard built in the store this week to protect the Suits and Ladies Dresses from the dust which we occasionally have up and down the street.

THE RAYMOND RECORDER

Bank of Montreal Crop Report

GENERAL—With indications pointing to an early harvest, crops over the prairie provinces have shown further deterioration during the past week as a result of the dry hot weather while grasshoppers and hail have taken toll over certain areas. Conditions in northern districts generally are satisfactory but rain is urgently needed over the central and southern areas. A leading grain company which two weeks ago estimated the condition of the prairie wheat crop at 77% of normal now estimates this at 62%. In Quebec crops as a whole present a good appearance and, while rain would be beneficial in some sections the general condition may be considered satisfactory. In Ontario while spring grains and roots have benefited from recent showers generous rains are required in most areas particularly in the southwestern section of the province where no precipitation has occurred during the past week. The Maritime Provinces have experienced a prolonged period of dry weather and all crops need rain. In British Columbia, cool weather with showers has been fairly general throughout the province and while it has retarded the ripening of tomatoes, the general situation is satisfactory. Details follow:—

PRAIRIE PROVINCES

ALBERTA—Northeastern Area. Wheat is mostly headed and coars, grains are well advanced. Pastures generally a good. Some hail damage has been reported. Southeastern Area. Rain is needed. Damage from grasshoppers has been slight. Western Area. In the north and Peace River district crops are making good progress while in the central areas considerable hail damage has occurred and crops require rain to assist recovery. In the southern section irrigated grain and beet crops continue satisfactory but rain is urgently needed for other crops and pastures. **SASKATCHEWAN**—Northern Area. Wheat is about 90% in head and the condition of all grains is promising but rain is required in eastern and western central districts. Pastures generally are good. Southern Area. Prospects are poor and the crop will be a failure in many districts. Pastures are becoming bare and some livestock is being moved north. **MANITOBA**—With the exception of the Swan River district and part of the Red River valley area crops show further deterioration as a result of heat and drought. Prospects over most of the province are fair to poor with total failure indicated in the southwestern district. Wheat is ripening prematurely and grasshoppers are causing damage particularly to cereals.

PROVINCE OF QUEBEC—Grains are progressing satisfactorily.

only in all sections of the province and promise an average yield. Oats are long in the straw. Fodder corn has made good progress during the recent warm weather. Haying is being carried on under favorable conditions. The crop is expected to be average and of good quality. Grass pasturage generally is plentiful. All root crops are making satisfactory progress but in some sections rain would be beneficial. Tobacco is growing well. Present indications point to a below average apple crop.

PROVINCE OF ONTARIO

Threshing of a light crop of fall wheat is underway and generally the grain is of good quality. Spring wheat is maturing rapidly and cutting has commenced. Barley and oats are ripening fast and average yields are foreshadowed. Corn continues to make satisfactory progress and prospects are favorable for a normal crop. Early sugar beets are disappointing and, while other root crops are showing good growth, more moisture would be beneficial. Pastures are dry and brown in many localities necessitating supplementary feeding of dairy cattle. Early peaches and plums of good quality are being marketed. Apples will be light. Grapes are developing well and a good yield is anticipated. Tobacco growth has been retarded by prolonged dry weather and topping has been delayed in some sections.

MARITIME PROVINCES

Dry weather has adversely affected grain and root crops in Nova Scotia but in New Brunswick and Prince Edward Island indications point to an average crop of oats while root crops are progressing satisfactorily. Earlier varieties of potatoes are approaching maturity. Apple orchards are in satisfactory condition and indications point to a fairly good crop. Haying is general but except in Prince Edward Island the crop is of fair quality only, and below average. Grass pastures are drying up rapidly.

BRITISH COLUMBIA

Haying has been completed in most districts and a heavy crop has been harvested. Average grain crops are expected. Roots and other vegetables are in good condition but cool weather has retarded the ripening of tomatoes. Hops are estimated at 80% of average. Fruit trees continue in good condition. An average crop of apples of good quality is expected but other tree fruits will be somewhat below average. Pasturage is plentiful and there is sufficient water for irrigation purposes.

News Notes

Mr. and Mrs. J. R. Humphries, and Mr. and Mrs. M. R. Woolf returned last Friday evening from a holiday trip which included a trip to Belton, Montana, over the beautiful Logan Pass, visits to Glacier Park, Waterton Park, Yarrow Creek, and a number of side trips in both parks. They report a very enjoyable time.

Mr. and Mrs. Frank Shaw, and Mr. and Mrs. Ira McBride left Wednesday at noon on a holiday trip which will take them to Banff, Lake Louise and probably to Missoula, Mont. On Monday Frank was so anxious to get away that the two days intervening seemed like weeks to him.

James S. Anderson was called to Cardston on Sunday to the bed side of his brother Patrick. John F. Anderson, former Bishop of the Raymond First Ward. James S. returned home Monday morning on the bus and reported a slight improvement, but said his brother was still a very sick man at that time.

HAVE you noticed that your happiest hours occur on days when you feel your best?

Have more of these happy days. You and all your family. Guard health while you have it. Keep on the sunny side of life.

The greatest enemy of health is common constipation. It may cause loss of appetite and energy. Certainly it kills enthusiasm! Yet it can be banished by eating a delicious cereal.

Laboratory tests show Kellogg's All-Bran supplies "bulk" and vitamin B to relieve common constipation. Also help for the blood.

The "bulk" in All-Bran is much like that in leafy vegetables. How much pleasanter to eat this delicious ready-to-eat cereal than to take patent medicines. Two table-spoonfuls daily are usually sufficient. Chronic cases, with each meal. If not relieved this way, see your doctor. Made by Kellogg in London, Ont.

who can do your work.

LAYING THE FOUNDATION FOR NEXT YEAR'S HONEY CROP

(Experimental Farms Note)
A strong force of bees ready for field work at the commencement of the main flow of nectar is the beekeeper's objective and is the result of careful preparations made during the eleven months previous to the flow. The beekeeper's year begins with the first of August, for it is then that he must begin his building up process for the crop of the following summer. The bees of any one year will take no part in the actual gathering of the crop of the following year, but they play an important indirect part in its success or failure. A powerful force of bees ready for the harvest is the result of strong colonies, good queens, sufficient food and proper management during the spring and early summer months and the first three factors of this combination are in turn dependent upon those same conditions being present the previous autumn. The queen is the mother of every other bee in the colony and is, therefore, responsible for the strength of the colony, but to produce a strong colony she must be young and prolific and she must also receive assistance from the beekeeper in order to perform

Bishop and Mrs. H. F. Allen and family have been holidaying for a week in Waterton Park.

Mr. and Mrs. T. Geo. Wood, and Mr. and Mrs. Frank R. Taylor returned home the first of the week from a visit to the Century of Progress Exhibition at Chicago, and with relatives and friends in Utah. "T. Geo." says it is real work to try and see the big show in such a hurry, but it is certainly worth one's while to visit it.

her task efficiently. At the Bee Division, Central Experimental Farm, Ottawa, it has been found that at least two months are required to build up a force of young bees capable of withstanding the rigours of winter in a satisfactory manner. As brood rearing usually ceases by the end of September or early in October, it means that the production of this force of bees must commence about the first of August. The foundation for next year's honey crop is, therefore, laid by making sure that every colony is headed by a young and vigorous queen early in August so that she has sufficient time to produce a large force of bees before the end of the brood rearing season. To perform the duties expected of her the queen must have ample room for maximum egg production and there must always be an adequate supply of food available for the brood she produces. Other things being satisfactory, strong colonies headed with young vigorous queens in the fall are the best assurance of strong colonies the following spring and a strong force of field bees in time for the harvest.

Of course, Mavis Talcum is as indispensable as a razor to well grooming after shaving. Men prove that everyday. But don't stop there... To really enjoy the benefits of Mavis Talcum, as millions of both men and women now do, sprinkle or lightly massage the same incomparable Mavis Talcum over the entire body. That's comfort—and protection! Cools—absorbs perspiration—deodorizes.

MAVIS TALCUM POWDER

The FIRESIDE PHILOSOPHER
By ALFRED BIGGS

Facts dispel fancies.

You can't win if you're afraid to try.

Science, music and art know no nationality.

You may play a good game and still be a loser.

The virtues of today often are the virtues of tomorrow.

Only a few people have true knowledge of themselves.

Only a few people measure values by the same standards.

HEALTH**MORE PREVALENT?**

In a recent issue of the Quarterly Bulletin distributed by the Department of Health of New York City, there is an interesting article which is written as an answer to the question: "Is cancer becoming more prevalent?"

It is pointed out, first of all that it is to be expected that there will be an increase in the total number of deaths from causes such as cancer, which occur in the elder age groups. As is generally known, the average expectancy of life has increased considerably, so that today, a larger percentage of the population are in the age groups attacked by cancer.

No one has questioned this fact, but many have said that after making due allowance for this aging of the population, there has been an actual increase in cancer. The New York figures do not support this view, and the conclusion is reached "that cancer is probably no more prevalent now, in any given age group, than it was a generation ago."

We do not think that this ends the controversy, but we do believe that this note of comparative optimism should be heard.

The cancer problem is serious enough that it does not require the slightest exaggeration to focus attention upon it. But it is equally desirable that we should not become unduly pessimistic.

These New York figures would indicate that, in so far as the population of that city is concerned, there is no new force or condition which has arisen in recent years, to cause an increase in cancer. There is nothing to indicate that the foods used or the methods of cooking employed by civilized people today are leading to an increase in cancer.

Whether or not cancer is on the increase in the population is of little interest to the person who develops the disease. To him, the one and only question of importance is—Can anything be done for me in the way of treatment? The answer to this question remains the same as it always was. The chance of cure depends very largely upon early recognition of the presence of the disease, followed by proper treatment. No one can say just how many lives would be saved by early diagnosis and proper treatment but we do know that in no other way can these lives be preserved.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Mr. and Mrs. P. D. Bennett left Sunday on a trip to Missoula, Mont. and other points, for a few days visit with relatives and friends.

Christopher Nilsson is around again, after two or three weeks in bed following a fall from a haystack, landing on his head and shoulders, and stiffening him up until for two weeks he was unable to move his head. His recovery is a source of satisfaction and joy to his family and friends. He is 67 years old and fell 12 feet from a rickety wooden structure to stand this.
